

Enersorb is simply.

Premier Foam is proud to introduce the most advanced energy absorbing foam technology on the market.

- Enersorb foam is manufactured to meet stringent requirements for energy absorption, cushioning and protective purposes.
- Enersorb reacts to temperature and softens when warm, giving near pressure free support.
- When struck a blow, Enersorb will absorb most of the shock at impact.
- Enersorb is an ideal foam for many applications in technical packaging, automotive or sporting goods when vibration dampening is required.
- Enersorb comes in a variety of densities and firmnesses to meet your demanding requirements.

Enersorb is the ideal foam product when protection is paramount. Whether protecting sensitive medical devices, children in sporting activities or the professional athlete, Enersorb is the advanced foam technology for you.

Premier Foam™

Foam Type	Target Density	Target IFD	Flamm.	Color	Stock bun Size	Comments
